SUBJECT: Pagel's Pit Site Draft RD/RA Health and Safety Plan

FROM: Bernard J. Schorle, RPM, IL/In No.2 (HSRL-6J) *BJS*

TO: Stephen L. Ostrodka, Chief, Technical Support Section
(HSRLT-5J)

Would you please have someone review the attached draft RD/RA Health and Safety Plan for the Pagel's Pit site near Rockford, Illinois?

For your information, I am also attaching a copy of the Statement of Work that is part of the Consent Decree.

This site is an operating landfill taking in primarily municipal refuse and sewage treatment plant sludge. It already has some leachate and gas extraction. The landfill is expected to continue to operate until it reaches its permitted capacity. Recently the operators obtained a permit from the State of Illinois that allows them to begin work on a new landfill unit to the south of the present facility. There may be some activity at the present landfill associated with the new unit.
